**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 10 recites the limitation "the initial position" in line 6. There is insufficient antecedent basis for this limitation in the claim.
4. Claim 11 recites the limitation "the direction and distance data" in line 2. There is insufficient antecedent basis for this limitation in the claim.
5. Claim 11 recites the limitation "the basis of criteria" in line 4. There is insufficient antecedent basis for this limitation in the claim.
6. Claim 11 recites the limitation "the result of the evaluation" in line 5. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by European Publication No. EP-1125826.

European Publication No. EP-1125826 discloses a motor vehicle having an apparatus for damage limitation in the event of an offset frontal collision, with the motor vehicle having a steering apparatus (34a) which is associated with the front wheels (38), characterized in that at least one reversible actuator (40) with a very fast-acting power source is provided in the steering apparatus (34a) and influences the turning of the steerable wheels (38) via connecting elements (36) such that the wheels (38) can be turned both in opposite directions and at least one wheel (38) can be moved back to the initial position; wherein two actuators (30, 40) with an external power source are provided, with each actuator being associated with a steerable wheel (38), wherein the actuator is an electric motor.

***Allowable Subject Matter***

9. Claim 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
10. Claims 11-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
